Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by So (US 6,676,015).

So teaches a media sensing method for automatic media dispenser comprising:

a) generating a first light signal adjacent a pathway of an automated banking machine with a light source, wherein the light signal includes an intensity that changes over time in a first pattern, wherein the automated banking machine includes a cash dispenser;

b) detecting the first light signal with a light detector positioned adjacent the pathway;

c) determining with the machine that the intensity of the detected first light signal varies in time with a pattern that corresponds to the first pattern;

d) responsive to (c) moving at least one item through the pathway, wherein the at least one item includes a sheet of currency; and

e) periodically calibrating the sensor circuit. (See col. 3, line 62 to col. 4, line 62)

***Allowable Subject Matter***

3. Claims 3-5 and 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: The prior of record, taken alone or in combination, fail to teach or fairly suggest, in conjunction with other limitations in the claims, detecting a second light signal and determining with the machine that the intensity of the detected second light signal does not have an intensity that varies in time with a pattern that corresponds to the first pattern.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Skinner (US 2004/0056084) teaches a document handling apparatus.
